

PRODUCT DATA SHEET

RYE LITHIUM GREASES

- 1) **DESCRIPTION.** A range of lithium based greases with good stability and high melting point.
- 2) **APPLICATION.** Ball and roller bearings, hubs, universal and ball joints of cars, trucks trailers and construction equipment, farm tractors and machinery. Plain bearings, sliding surfaces, splines and general moving parts on industrial machinery.
NLGI No 3 Grade is recommended for water pumps.
- 3) **QUALITIES.** High melting point
Excellent mechanical stability after prolonged working.
Resistance to water and oxidation.
Good rust protection.
- 4) **ADVANTAGES.** Long service life. Multi purpose properties reduce the range of greases that need to be held in stock.
In wheel hub applications, good thermal stability prevents leakage onto brake linings.
Good pumpability through hoses and grease guns. Available in a wide range of packages including cartridges for hand and mechanical applicators

5) **TYPICAL CHARACTERISTICS.**

Grade.	Multi 1.	Multi 2	Multi 3
NLGI No	1	2	2
Drop point °C	185	185	185
Worked penetration.	310/340	265/295	220/250
Soap base.	Lithium	Lithium	Lithium.
