

PRODUCT DATA SHEET

RYE UNITRANS

- 1) **DESCRIPTION.** A transmission and hydraulic fluid for use in tractors and contractors plant..
- 2) **APPLICATION.** Transmissions those final drives including those with 'Wet Brakes' of most tractors and contractors plant.
Hydraulic and power steering systems, torque converters requiring 'Allison' C3 and C4 fluids and Ford 'Select-O-Speed' transmissions.
Substitutes for International Harvester 'HYTRANS' fluid, outside warranty.
- 3) **ADVANTAGES.** A single oil with which to service nearly every tractor transmission and hydraulic system. Provides an extremely effective alternative to "Universal" oil when a separate engine oil is preferred
- 4) **SPECIFICATION.** API GL4.
John Deere J20C.
Massey Ferguson M.1135 M.1127A M 1129A.
JI Case MS 1206 MS 1207.
Ford. M2C86B M2C134D.
Allis-Chalmers PF 821.
IH IHC/B6.
- 5) **QUALITIES.** Wide operating temperature range.
Excellent wear resistance for gears and pumps.
High water tolerance for humid atmospheres.
Prevents 'Squawk' from oil immersed brakes.
Provides sufficient friction to drive PTO's.
Good Foam resistance.
- 6) **Typical characteristics.**
