

VINTAGE ENGINE OILS

- 1) **DESCRIPTION.** Monograde engine oils containing anti-wear and anti-oxidant additives blended with high quality base oils. SAE grades 20, 30, 40 and 50 available.
- 2) **APPLICATION.** Petrol engine built prior to 1964 and diesel engines prior to 1960.
- 3) **ADVANTAGES.** The vintage range is formulated especially for older engines, and offers excellent anti-wear and anti-oxidation protection. It also avoids the problems which can be caused by the use of modern high detergent /dispersant oils.
- 4) **CLASSIFICATION.** API SB/CB

5) **TYPICAL CHARACTERISTICS .**

SAE	30	40	50
Kinematic Viscosity. 100°C mm ² /s	11.5	15.0	19.0
Pour point °C	-18	-15	-12
Flash point °C	245	245	250
